PHY 113 – General Physics I
Summer II
July 9 – August 11, 2018

YOUR VOICES HAVE BEEN HEARD!

The PHY 113 section for Summer I is already full, but we just opened another section for Summer II for high-achieving and ambitious students like you!

Benefits of taking a physics class over the summer:

- Remain productive during the summer months
- Keep your brain active all year round
- Increased student/professor interaction in a small-sized class
- With a reduced course load, you can focus more on a difficult course and get a better grade

Essentials of mechanics, wave motion, heat, and sound treated with some use of calculus. Recommended for science, mathematics, engineering and premedical students. Credit allowed for either 111 or 113, but not both.

Lecture: 51988 – MTWRF 9:30AM - 1:30PM

Lab: 51989 – TBA

Lab - 2 hours. C-MST 111 or 112 or equivalent (D, QR)

Course Attributes: Div PHY, Div V - Phy, QR

Contact: Dr. Bin He    Olin 108A    hebin@wfu.edu
